

Multi-seed Drill

Innovator : Sh. Gopal Dave
District : Jodhpur
State : Rajasthan

Brief Description:

It is a seed drill system especially aimed to enable farmers to carry out multi seed drilling either simultaneously or separately (*locally called 'BHELIA'*) having a unique seed metering mechanism. The device suits best for mixed cropping and saves labour and time consumed in clearing seed containers for next seed sowing. At the same time it saves the time and cost of second sowing.

Salient features:

- Unique seed metering system to ensure accurate and consistent supply of seeds
- Equipment capable to sow seeds of different sizes either mixed or separately (*Locally - known as BHELIA that means in mixed seeds sowing*)
- Easily affordable and operable (low cost)
- Easy maintenance and repairing (easy handling)
- Equipment less in weight for easy transportation and employing
- metering system is easily adjustable to suit different situations
- Uniform sowing, irrespective to speed of vehicle and uneven land
- Automatic controlling of seed supply at the borders of land for saving seeds from wasting
- Equipped to sow seeds even for a minimum quantity

IPR Status

Patent Filed.

Unit Price:

Rs 6500/- (*Ex-works for seed drill*) & Rs. 12000/- (*Ex-works for seed cum fertilizer drill*)

Current status

The product has been commercialised. It has been supported by GIAN-N/ NIF for business promotion under Micro Venture Innovation Fund.
