

Solar cum Electrical Laminator

Innovator : Sh Amandeep Singh
District. : Hanuman Garh
State : Rajasthan

Brief Description

This is a document laminator which operates on solar energy as well as electrical energy. The laminator focuses solar heat on the surface of a metal plate which in turns facilitates the lamination. This may find good application in the rural where there is scarcity of electricity. The device may also be helpful in livelihood generation as it may also converted into a mobile laminator. The operating cost and cost of lamination is lower than the conventional laminators.

Salient Features

- This is a good product for areas where electricity supply is erratic or not present at all.
- The machine can also be used as a conventional electrical lamination machine in absence of solar energy by switching on the bulbs fitted inside.
- On a sunny day, it can laminate the document of A4 size in 15 minutes.
- Simple technology and easy to use.
- No formal training is required to operate the equipment

IPR Status

Patent is under process

Price

Rs. 4500/- Net/Unit

Special Achivement

Recognized by National Innovation Foundation, Ahmedabad
